INDUSTRY: Any

PYTHIAN SOLUTIONS FOR GOOGLE WORKSPACE ENTERPRISE CUSTOMERS

Google Workspace Security Posture Analysis

Pythian's team of experts has developed a Google Workspace Security Posture Analysis based on our team's 75+ years of collective experience deploying and managing Google Workspace. Pythian's approach couples our previous **Google Workspace Security Health Check** with a deep dive into the actual data within your organization.

With Pythian's Security Posture Analysis, your organization will be positioned to reduce risk exposure and better protect your users and company data.

Phase 1:

PREPARATION AND PYTHIAN'S GOOGLE WORKSPACE SECURITY HEALTH CHECK

Pythian will document your organization's existing Google Workspace security settings and provide a configuration report with our security evaluations and recommendations.

This report will cover all Google Workspace security settings, including:

- Google Workspace Core Services - Drive, Gmail, Sites, Groups, etc., including sharing policies and group management
- Security Policies - including data loss prevention, retention policies, and access privileges
- Identity and Authentication - including user management
- Endpoint Management
- Email Security

New to Google Workspace and not ready for a full Security Posture Analysis? Get started with Pythian's Google Workspace Security Health Check, a great way to baseline your organization's Google Workspace settings.

Phase 2:

GOOGLE WORKSPACE SECURITY DEEP DIVE

Pythian will provide detailed reports, analysis and workshops on all the critical data within Google Workspace. A series of workshops will be held to review the risk exposure and recommended risk management tactics specific to your organization. This phase will focus on correlating the data with the Google Workspace configuration report from the previous phase.

Phase 3:

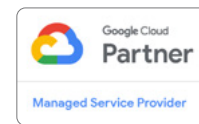

GOOGLE WORKSPACE SECURITY SUMMARY

Pythian will provide a ready-to-present summary of the findings and recommendations for your C-Suite leadership and management teams.

Pythian's Google Workspace Security Posture Analysis is approximately an 8-10 week engagement, variable based on your organization's data size.
